

INMOTION

PRODUCT PRESENTATION

THE NEW CT/HE BOX

FLEXIBILITY REDEFINED

EUROPLAST is a pioneer in the development of new, resource-efficient production processes.

The innovations concentrate on technically advanced solutions that are developed in harmony with nature and in a carbon-neutral manner. One example of this is the new CT/HE box.

The CT/HE box is a continuation of our series of hygienic, food-safe boxes and enhances them with its exceptional flexibility. Thanks to its rounded corners and small angles, it is especially hygienic and easy to clean, making it ideal for food safety purposes. This makes the box, which measures 1200 x 800 mm, ideal for the food sector, for example, for the meat industry or for grape

harvesting. The third runner (also usable with a turnstile) is a particularly special innovation.

In the future, the CT/HE-Box will replace the CT/H2-Box and will be available from summer 2023 in three versions: 4 feet, 2 support bars, and 3 support bars. The new box is compatible with competitors' boxes and stackable. Heavy-duty versions are available on request.

FEATURES

- > **Dimensions:**
1200 x 800 mm
- > **food safe**
- > **Additional runner**
(new support bar solutions)
- > **Digitisable** (Chip Nest)
- > **RFID Tag**
- > **Standard light grey**
Industrial colour
(special colour on request)

CASE STUDY

BIOLOGICAL. REGIONAL. GOOD. CHEESE MANUFACTURER FROM UPPER CARINTHIA RELIES ON EUROPLAST QUALITY

This motto from our customer "Kaslabn" from Radenthein is 100 % aligned with our company philosophy.

Here, our food-safe boxes, produced in a CO₂-neutral manner, are used in the production process.

The boxes' excellent cleanability is ideal, especially for demanding hygienic requirements.

We are grateful for the trust placed in us by this customer and congratulate them on the outstanding quality of their speciality cheeses from the region.

CONTRACT MANUFACTURING

QUALITY IS MY SANCTUARY

Johann Offner (1839-1911)

EUROPLAST's state-of-the-art production facilities are not only used for its own products. More and more companies are commissioning EUROPLAST to manufacture products that they then market exclusively themselves. Of course, these companies are generally the quality leaders in their industries.

EUROPLAST is proud to have **OFFNER WERKZEUGE**, the quality leader for tools, as a new customer. In the future, the long-established company's snow shovels and snow pushers will come from EUROPLAST's factory halls. Our relatively new cooperation is going extremely well. Additional products are already in the pipeline. Our products are valued for their quality and durability over many years and contribute to environmental protection.

LEADERSHIP CHANGE DURING RECORD YEAR

Arthur Primus (50), an industrial engineer from Möllbrücke, joined our company at the beginning of 2017.

His formulation of the strategic focus on "speed and sustainability" resulted in a series of measures that enabled Europlast to grow continuously in its core markets. The establishment of Innovation Management and Business Development as well as the development of internal marketing competences increased the company's visibility and also led to the enhancement of contract manufac-

turing, which is increasingly gaining in importance.

Customer surveys conducted for the first time showed a 100 % referral rate as early as 2021, validating the path. With Mario Guggenbichler, the company hired an experienced in-house sales manager, and with Claudia Kogler (AUT), Lucian Rösler (GER), Marius Ghete (ROM) and Sylwester Samoljo (POL), a powerful cus-

Helmuth Kubin

tomers service structure with a strong back office was established.

Arthur Primus is now leaving the company at his own request on 31 March 23, which we very much regret. Helmuth Kubin (72) will take over the management of the company on behalf of our owners JCO Plastic until a successor can be presented.

DID YOU KNOW THAT...

RECYCLING MADE EASY WITH THE **YELLOW** BIN!

SIMPLER MORE
ENVIRONMENTALLY
FRIENDLY MORE
PRACTICAL

Since 1 January 2023 uniform regulations have been in place throughout Austria for the yellow bin. The new regulation aims to increase the amount of plastic packaging that is recycled.

THE PEOPLE AT EUROPLAST

SOPHIE UNTERGUGGENBERGER

Born in 1999, lives in Nussdorf/Debant

Hobbies: Cycling, badminton, hiking, ski touring

Working at Europlast since 1 August 2018

Started in Intermediary Services and then moved to Internal Sales.

Area of responsibility: In Internal Sales since 2020 (order confirmations, general customer contact)

I prefer to recharge my batteries in nature or through sports activities. My great passion is travelling with the whole family.

“ THOSE WHO LIVE IN HARMONY WITH NATURE APPRECIATE WORKING FOR A SUSTAINABLE COMPANY. ”

SOCIAL RESPONSIBILITY

HELP KNOWS NO BORDERS

Social responsibility and solidarity are extremely important to us.

That's why at Europlast we have launched a fundraising campaign for the earthquake victims in Turkey and Syria. We provide emergency supplies, pack them in our transport-proof boxes and send

them to the earthquake zone. We also double the donations raised by our employees, because once again our team's generosity shows us that

We at Europlast stick together and help where help is urgently needed.
